SMART INDIA HACKATHON 2026

SMART INDIA HACKATHON 2026

DRISHTI

The AI-eye on every MPLADS rupee

AI checks on every MPLADS work — flags what needs checking, with the evidence

- **Problem Statement ID –** SIH26102
- **Problem Statement Title-** Development of an AI-powered system to detect anomalies, fraud, and inefficiencies in MPLAD Scheme implementation regd.
- **Organisation-** Ministry of Statistics & Programme Implementation (MoSPI)
- **Theme-** Smart Automation
- **PS Category-** Software
- **Team ID-** 121911
- **Team Name-** NeuralNexus

NeuralNexus

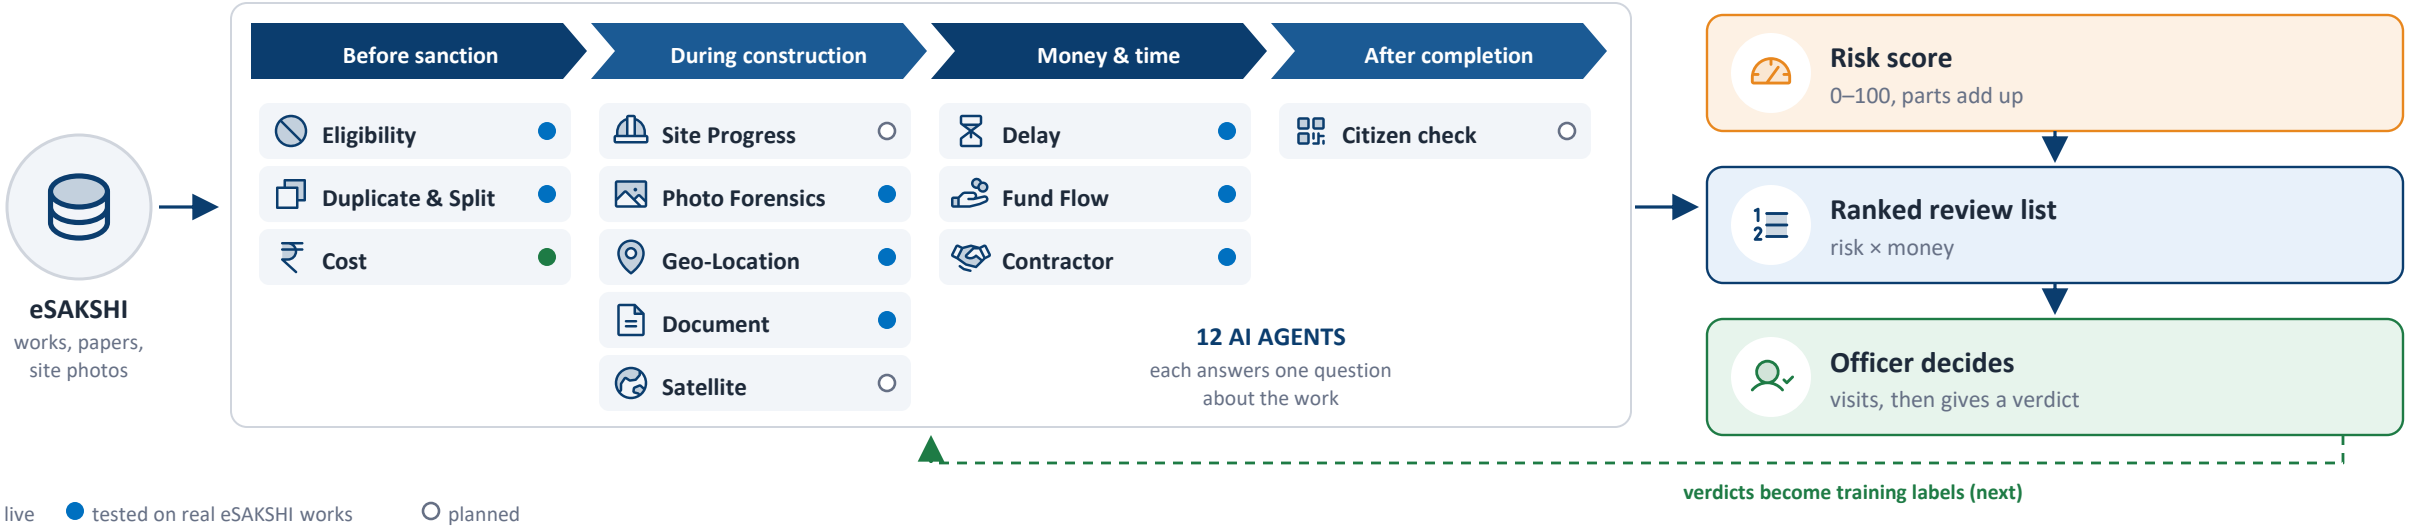

DRISHTI · *the AI-eye on every MPLADS rupee*

SMART INDIA HACKATHON 2026

Proposed Solution (Describe your Idea/Solution/Prototype)

A read-only AI layer on eSAKSHI. Every work is checked; only the risky ones reach an officer, with the evidence.

DETAILED EXPLANATION OF THE PROPOSED SOLUTION

live · tested on real eSAKSHI works · planned

How it addresses the problem

- **4,918** works had no plaque (CAG) → **Photo + plaque check**
- **12,006** works left incomplete (CAG) → **Stuck-work alerts**
- **10%** of works a district must inspect → **Risk-ranked visit list**

Innovation and uniqueness of the solution

- **Reads the GPS stamp** — printed inside site photos
- **Proven before launch** — on real eSAKSHI works
- **Evidence, not accusation** — every flag cites its clause
- **Reads papers for free** — certificates & bills, on our server

NeuralNexus

TECHNICAL APPROACH

SMART INDIA HACKATHON 2026

Technologies to be used (e.g. programming languages, frameworks, hardware)

Screens — web dashboards
Next.js · React · Tailwind · MapLibre

Engine — API + agents
Python · FastAPI

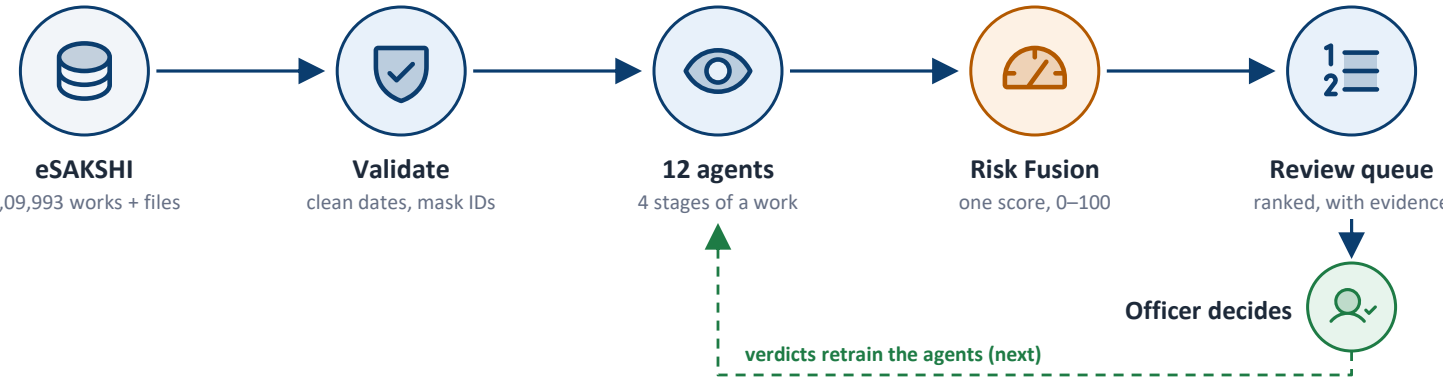

Data — Mumbai region
PostgreSQL · Supabase

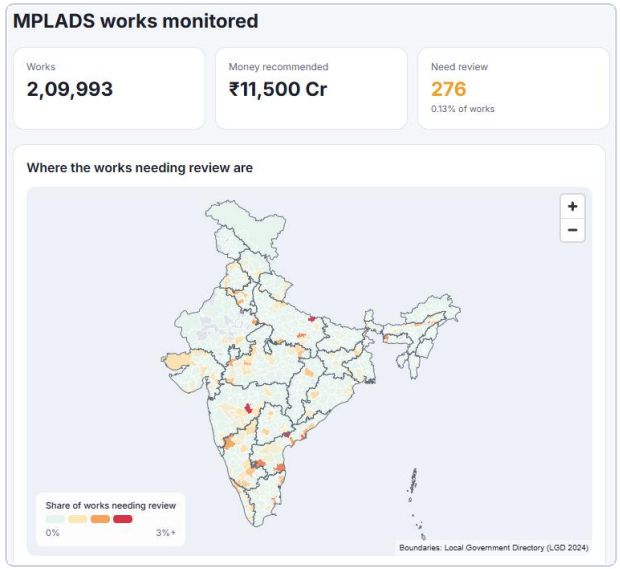

AI & vision — + LightGBM, OCR
scikit-learn · OpenCV · pandas · Gemini*

Hosting — tests on every push
Vercel · Actions · GitHub

No hardware to buy
officers use a browser or a phone · *Gemini planned

Methodology and process for implementation (Flow Charts/Images/ working prototype)

WORKING PROTOTYPE · LIVE

drishti-lyart.vercel.app

2,09,993 real works assessed

276 in the review queue (0.13%)

837 real works tested with their files

EVERY AGENT ANSWERS IN ONE FORM

status · risk · confidence · evidence · what it could not check

SIGN-IN BY ROLE

Ministry — all India

District — own district

Field — site visits

NeuralNexus

FEASIBILITY AND VIABILITY

SMART INDIA HACKATHON 2026

Analysis of the feasibility of the idea

EACH AGENT, MEASURED ON REAL eSAKSHI WORKS

Cost — LIVE
63% of 5× mark-ups caught · 1.5% false alarms

Photo Forensics — TESTED
99.9% of edited photo copies recognised

Geo-Location — TESTED
12 / 12 GPS points correct when checked

Document — TESTED
≥99% of amounts & payment dates read

Eligibility — TESTED
56% of its flags plainly prohibited

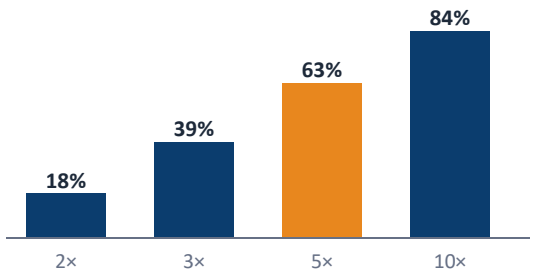

Split works — TESTED
12× more works just under ₹5 lakh

Delay — WEAK
0.71 vs 0.68 for the office's record

Satellite — OFF
OFF pilot works too small to see

Citizen — DEMO ONLY
4 of 21,793 eSAKSHI ratings are above zero

COST AGENT: INFLATED WORKS CAUGHT

FEASIBILITY

Technical
live on Vercel + Supabase

Data
2 in 3 finished works have files

Operational
read-only, no new data entry

Economic
open source, AI cost capped

Potential challenges and risks

Strategies for overcoming these challenges

Potential challenges and risks	Strategies for overcoming these challenges
No confirmed fraud labels	Planted test cases; officer verdicts as labels
False alarms	Price alone never makes a work high-risk
Hindi & handwritten papers	Unclear reads = “can't tell”; AI reader capped
Personal data in records	Phone & bank numbers masked; role access
Portal habits look odd	Compare each office with the same period

PROOF BEFORE LAUNCH

NeuralNexus

IMPACT AND BENEFITS

SMART INDIA HACKATHON 2026

Potential impact on the target audience

Ministry
national risk map
sanction backlog

State nodal
district track records
what to escalate

District
276 works to review
10% inspection plan

MPs & citizens
live work status
stuck-work warnings

FROM EVERY WORK TO THE FEW THAT MATTER

ALREADY FOUND IN REAL eSAKSHI DATA · each one needs checking, none is a verdict

21,323
works waiting for sanction past 75 days

40,489
works still incomplete after two years

136
bulk orders kept just under ₹5 lakh

282 / 285
"done" works whose papers say "in progress"

3
works photographed finished before recommended

Benefits of the solution (social, economic, environmental, etc.)

Social
assets exist where claimed
trust through open records

Economic
risk caught before money moves
visits go where risk is

Environmental
remote checks from photos
fewer wasted site trips

Next steps

- ✓ **Prototype live** — + 837-work trial
- **M1** — **Document +** Contractor
- **M2** — **Eligibility,** splits, repeats
- **M3** — **Photo +** Geo checks
- **M4–6** — **AI reader,** field app

How DRISHTI compares with existing monitoring

Capability	Existing systems*	DRISHTI
Coverage	audits check a sample	every work, 2,09,993
Cost vs similar works	manual, in audits	live, every work
Reused / edited photos	viewed by eye	99.9% recognised
Photo place & time	geotag on a map	stamp read + checked
Reads certificates & bills	stored as files	dates, payments, vendor
Split works & repeats	not automated	splits yes; rewording next
Risk-ranked review list	picked by hand	276, by risk × money
Reason for each flag	—	evidence + clause
Progress from photos	checked by eye	planned, AI vision

yes · partly · no

*eSAKSHI, PMAY-G AwaasApp, GeoMGNREGA / NMMS, CAG & social audits, as their own public documents describe them
